

Got a forklift or store batteries? You may need an EPCRA Plan. Join our webinar to find out how to stay in compliance and avoid fines.

Emergency Planning & Community Right-To-Know Act (EPCRA) requirements are in place to protect your community and first responders in the event of an environmental emergency. If you store hazardous chemicals, such as sulfuric acid (stored in batteries), gasoline, motor oil, antifreeze, the lead in batteries and diesel, you may have to comply with federal regulations. Join our webinar to learn how to stay in compliance, avoid fines and stay informed about the chemicals at your facility and in your community.

What you will learn:

- Who is affected by these rules
- Important compliance dates
- Compliance requirements
- How to submit paperwork to the EPA
- Who enforces these rules

Who should attend?

- Environmental consultants
- Facility managers for manufacturers
- Warehouse managers

Webinar Date: Tues. Mar. 20, 2012

Time: 10-11 a.m. EST

Fees:

\$10 for KY EXCEL members*
\$20 for all others
